CompactionSummary[@T] RolesFrag

Name C := sys.last_compaction_turn[@T] // 0 while no compaction has occurred

Name lastHeadRole :=

sys.role_of_last_protected_head_row[@C] // as a strict chat template counts it; none when

Name firstTailRole := sys.role_of_first_surviving_tail_row[@C]

Name forcedUser :=

sys.summary_role_forced_to_user[@C] // protected head empty (every compaction after the firs

// Preferred role: the one that alternates with the head (tool rows and tool-call assistant rows are invisible to that check); an empty head or the forced case gives user. On a collision with the first tail row no standalone row is emitted and the summary is merged into that row instead (see the first replayed turn in Mark 4).

◇ If forcedUser or lastHeadRoleisnone or lastHeadRole == assistant:

◇ If firstTailRole ≠ user:
